How free odds cut the combined edge on a pass line bet

Odds allowed	None	1x	2x	3-4-5x	5x	10x	100x
Edge on total bet	1.41%	0.85%	0.61%	0.37%	0.33%	0.18%	0.02%

Edge on total money wagered (line bet plus odds) when odds are taken on every point. The odds bet itself has no edge. The line bet always keeps its 1.41% edge, so the more you wager on odds the lower the blended figure, but the dollars at risk rise too. Don't pass with lay odds works the same way.

Edges here are percent of the amount bet on a bet that is resolved (or per roll for one-roll bets). One-roll bets resolve every roll, so money moves fastest on them. A low edge is still a loss over time.
