Tie-break and edge-case rules

- Same type of hand: compare the highest card of the combination first, then the next cards (kickers). Suits never break ties in standard play.
- An ace counts high (A K Q J 10) or low in the "wheel" straight A 2 3 4 5. The wheel is the lowest straight. K A 2 3 4 does not wrap round.
- In Texas hold'em and similar games you make the best five-card hand from all the cards available. The ranks above are the same, but the odds of being dealt each hand are different from the five-card table.
